1R Mill and Inlay and Miscellaneous Work between MP 197.9 and MP 210.3 in Montgomery and Herkimer Counties

QUESTIONS AND ANSWERS

- Q1. The subject project is a 1R Mill & Inlay Project. The 653 Item included in the Bid Items is for a Level 1 Ride Quality? It is my understanding that Level 1 is used when more than one lift of asphalt is specified in the Typical. This project call for one 2" lift of 12.5mm. Should the Ride Quality Item be changed to a Level 2?
- A1. Ride Quality is Level 1, as specified, so, Item 653.1010 is correct. Refer to Table 6.7.1.1 "Item Selection for Ride Quality of Asphalt Pavements" within Chapter 6 of the Comprehensive Pavement Design Manual. It is available from NYS DOT's website here: <https://www.dot.ny.gov/divisions/engineering/design/dqab/cpdm/repository/chapter6.pdf>
